

Fish Passage Barriers Corrected and Stream Miles Opened

- “Number” reflects the number of culverts, screens and water diversions corrected statewide in a given year, including data from Washington Department of Fish and Wildlife, Washington Department of Natural Resources, Washington Department of Transportation, Salmon Recovery Funding Board, Forests and Fish, tribes and local governments (US Forest Service data are not included). Because of incomplete reporting, these numbers are expected to be lower than actual values.
- “Miles” reflect the number of miles that are estimated to be opened as a result of barrier correction by year.
